

Chess Reader Synthetic Fixture

This is fixture pdf-synthetic-diagram-01, generated by packages/test-fixtures/generators/make-diagram-pdf.mjs for issue #2 of the chess-reader project. It contains only synthetic text and a synthetic chess diagram: no copyrighted book content of any kind.

This page intentionally carries no chess diagram. It exists so the recognition test suite can assert the recognizer correctly reports "no board found" here, instead of only ever being tested against a page that does contain a diagram.

See this fixture's entry in manifest.json for full provenance, licensing, and expected-value detail.

Diagram: a synthetic mid-game position, printed in an imitation book-diagram style (hatched dark squares, vector piece glyphs) to exercise the fenshot recognizer end-to-end from a real PDF document.

Position (White to move):

r1bqkb1r/pppp1ppp/2n2n2/4p3/2B1P3/5N2/PPPP1PPP/RNBQK2R
